UNITED STATES OF AMERICA

OTTO EGEA,

Defendant.

INFORMATION

The United States Attorney charges that:

GENERAL ALLEGATIONS

At all times relevant to this Information,

The Health Insurance Programs

1. The Medicare Program ("Medicare") was a federal health care program providing benefits to persons who were 65 or older or disabled.
2. Medicare was a "health benefit program," as defined by Title 18, United States Code, Section 24(b), and a "Federal health care program," as defined by Title 42, United States Code, Section 1320-7b(f).
3. Medicare was administered by the United States Department of Health and Human Services ("HHS") through its agency, the Centers for Medicare & Medicaid Services ("CMS"). Individuals who received benefits under Medicare were referred to as Medicare "beneficiaries."

4. Part B of Medicare covered partial hospitalization programs (“PHPs”) connected with the treatment of mental illness. The treatment program of PHPs closely resembled that of a highly-structured, short-term hospital inpatient program, but it was a distinct and organized intensive treatment program that offered less than 24-hour daily care and was designed, in part, to reduce medical costs by treating qualifying individuals outside the hospital setting.

5. Under the PHP benefit, Medicare covered the following services: (1) individual and group therapy with physicians or psychologists (or other authorize mental health professionals); (2) occupational therapy; (3) services for social workers, trained psychiatric nurses, and other staff trained to work with psychiatric patients; (4) drugs and biologicals furnished for therapeutic purposes that cannot be self-administered; (5) individualized activity therapies that are not primarily recreational or diversionary; (6) family counseling (for treatment of the patient’s condition); (7) patient training and education; and (8) diagnostic services.

6. Medicare generally required that the PHP provided at a facility that is hospital-based or hospital-affiliated, but Medicare also allowed PHP to be provided in a Community Mental Health Center (“CMHC”), which is a provider type under Part A of Medicare.

7. Medicare required that, to qualify for the PHP benefit, the services must have been reasonable and necessary for the diagnosis and active treatment of the individual’s condition. The program also must have been reasonably expected to improve or maintain the condition and functional level of the patient and to prevent relapse or hospitalization. The program must have been prescribed by a physician and furnished under the general supervision of a physician and under an established plan of treatment that meets Medicare requirements.

8. Typically, a patient who needed this intensive PHP treatment had a long history of mental illness that had been treated. Patients were ordinarily referred either (a) by a hospital after full inpatient hospitalization for severe mental illness or (b) by a doctor who was trying to

prevent full inpatient hospitalization for a severely mentally ill patient the doctor had been treating.

9. Medicare guidelines specifically excluded meals and transportation from coverage under the PHP benefit.

10. Medicare did not cover programs involving primarily social, recreational, or diversionary activities. Psychosocial programs that provided only a structured environment, socialization, or vocational rehabilitation were not covered by Medicare.

11. In order to receive payment from Medicare, a CMHC, medical clinic, or a physician was required to submit a health insurance claim form to Medicare, called a Form 1450. The claims may have been submitted in hard copy or electronically. A CMHC, medical clinic, and physician may have contracted with a billing company to transmit claims to Medicare on their behalf.

12. Medicare Part B was administered in Florida by First Coast Service Options, which, pursuant to contract with the United States Department of Health and Human Services, served as a contracted carrier to receive, adjudicate and pay Medicare Part B claims submitted to it by Medicare beneficiaries, physicians, or CMHCs. Medicare Part B paid CMHCs and physicians directly for the cost of PHP services furnished to eligible Medicare beneficiaries, provided that the services met Medicare requirements.

13. Florida Medicaid covered community mental health services, including PHP treatment.

14. An "Assisted Living Facility" or "ALF" was a facility licensed by the Florida Agency for Health Care Administration, whether operated for profit or not, which undertook through its ownership or management to provide housing, meals, and one or more personal

services for a period exceeding 24 hours to one or more adults who were not relatives of the owner or administrator.
